Dear Mr Birch,

Thank you for your letter concerning perforators.

We do manufacture a small number of these machines suitable for postage stamp perforation. They normally have a perforated design enclosed within $\frac{1}{2} \times \frac{1}{2}$ area. Lately all orders for these machines have come from U.S.A.

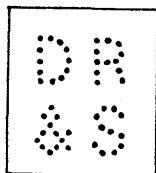

I enclose a sheet from our brochure showing the type of machine we produce.

Please contact me if you have any more queries.

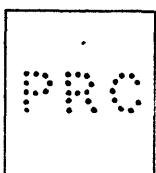

Yours faithfully,

Baddeley Brothers London Ltd.

This perforator is used by business houses to protect postage and insurance stamps against pilfering.

It can be supplied with ONE die to perforate 2, 3 or 4 initials on each stamp, or

With TWO dies, which will perforate 4 stamps (2 sheets thick), or

With FOUR dies to perforate 8 stamps (2 sheets thick). No more than 2 thicknesses should be perforated at a time, and before and after use the pins should be lubricated by perforating a sheet of paper on which sewing machine or other light oil has been spread.

The following shows the appropriate sizes of presses for various sizes of perforating dies.

- No. 1. 1-on die of 2, 3 or 4 letters or figures.
- No. 2. 2-on die side by side, up to 5 letters per square x 2.
- No. 3. 4-on die, up to 3 letters per square x 4.
- No. 4. 4-on die, up to 5 letters per square x 4.
